Rocheleau Tool & Die Co., Inc.*

ROCHELEAU TOOL & DIE CO., INC.

3rd Generation Family Owned and Operated

In 1938, Rocheleau Tool & Die Company was established by Leopold A. Rocheleau in the basement of his 6th Street home in Leominster. L.A. patented a line of cutter grinding fixtures and sliding swivel indicator bases as well as taking in job shop work.

In 1946, the company moved to a building located on North Main Street in Leominster. The small building was torn down in 1957 and a new 8000 square foot building was built on the property. Around that same time, Rocheleau Tool began to design and build machinery for the plastic industry. In 1976, Rocheleau became the first to build a new plant in Montachusett Industrial Park in Fitchburg.

Rocheleau has installations in 30 countries worldwide. We supply complete systems for plastic container manufacturing including primary processing equipment, bottle handling automation, trimming equipment, leak testers and conveyors. Projects can include container design and prototype development through design, manufacture and implementation of complete container manufacturing lines.
